Welcome to Premier Security Consultants Ltd

Welcome to the ever-expanding world of Premier Security Consultants.

We have been in business for more than 30 years providing a wide range of bespoke security products including the UK's most extensive range of Secured by Design LPS1175 SR2, LPS2081 and PAS24 2012 security doors sets and screens.

Premier works alongside many of the country's leading architects and designers delivering solutions to an array of clients including local authorities, housing associations and many of the UK's largest building contractors. Our services are fully backed by ISO9001:2008, CHAS and Construction Line accreditation bringing 'peace of mind' to our clients.

Our range of products and projects expand on an almost weekly basis. To keep pace with those changes, go to our website www.sbdsecuritydoors.co.uk

Products that lead the way

Four key words sum up Premier's approach to business: Ability; Flexibility; Diversity and Accountability.

Those drivers have helped us grow Premier's product range and expand our business to become the Go-To company for leading designers, architects and building contractors.

We are proud to be recognised as the UK's leading supplier of SBD security doors, automated gates, sceens, balustrades, balconies and automated turnstiles.

As the world of security products expands, so will we.

Why Premier gets stamp of approval from the industry

Premier offers a wide range of security products and bespoke security doorsets that have been tested and certified to the police "Secured by Design" standard LPS 1175 SR2, LPS2081 and PAS24 2012 which are available in various design configurations including Fire Integrity to 30 and 60 minute rating.

Access control system doors and screens are designed and built to order and are available in steel and stainless steel constructions. Our market-leading range of single and double option Jansen security doorsets includes over 200 different styles of doors all tested and certified to Secured by

Design standard. Our collection includes steel, stainless steel and fire-rated options, all stylish and guaranteed to last.

We also supply Industrial Security Doors; SBD tested integrated security mail boxes; bicycle stores and secured refuse stores.

Premier are proud members of the DHF Door and Hardware Federation and proud to be affiliated with: CHAS (Contractor's Health and Safety Assessment Scheme), The Welding Institute, Constructionline, Made in the UK, BRE, Interpon Powder Coatings, British Standards Institute and the Door Hardware Federation.

Secured by Design

Official Police Security Initiative

Secured by Design is a group of national police projects focusing on the design and security for new homes and commercial premises. SBD Licences are awarded to companies producing top-rated security products.

Safety Assured

Market leaders in Jansen doors

Premier's market-leading range of Jansen security doors includes over 200 different styles of doors all tested and certified to

When size matters...

Our range of Jansen doorsets are bespoke and made-to-measure, so can be configured to suit any application. Thanks to the highly robust nature of Premier's steel and stainless steel doors, they are ideal for high-traffic buildings such as offices, lift and stair core doors, schools, hospitals, sports centres, shopping malls, railway stations, banks and hotels.

Secured by Design standard LPS 1175 SR2, LPS2081 and PAS24 2012. Our collection includes steel and stainless steel options, all stylish and guaranteed to last. They are available in various design configurations including Fire Integrity to 30, 60 and 90 minute rating.

Our in-house manufacturing process ensures that our products are produced to the highest quality. We only buy the best quality steel products in standard 6m or 7.5m lengths. Standard steel sections, together with European Rolled Sections are used to provide the best product.

We have a long track record of working with the police, architects, contractors and local authorities, so you can rest assured that we'll be able to help with any specifications you have.

Premier's Industrial Revolution

Security doors and gates seldom win design awards, but here at Premier we endeavour to combine aesthetically pleasing designs with all the high-level security features you would expect from an industrial product.

Our in-house designers at our Hainault, Essex HQ are forever pushing the envelope of design and engineering and we believe our range of industrial doors is a market leader.

Again, our bespoke and made-to-measure service is a winner with clients.

We can provide a complete service from initial design through to installation of all products, including:- Communal entrance doors, including the only available steel louvre door sets incorporating

either Magna Locks or Assa Lock release to allow these doors to be fully access controlled, Boundary railings/fencing and associated gates.

The highest standards

Cutting and fabrication of our steel products, in accordance with all relevant British Standards and Welding Institute guidelines, is carried out at our premises in Hainault, Essex. Shot-blasting, powder coating and assembly are processed by our own trained staff retaining quality control and ensuring quick turnaround times and speed of delivery.

Offering sound solutions to fire

Recent events have put fire safety to the forefront of everyone's consciousness. Premier provides a range of high-security fire-rated products that deserve serious consideration.

Premier manufactures LPCB LPS 1175 SR2, LPS 2081 doors that are also available with fire rating certification of 30, 60 and 90 minutes.

They represent the ideal option for locations that require a higher level of security and have been favoured by clients operating within remote or substation sites.

They are suitable for a variety of applications including medium to high risk environments, energy, water, waste and telecom sectors, retail, distribution and commercial properties.

Our manufacturing process ensures that all

products are manufactured to the highest quality when both fire rating and security are a client's number one choice. Our sales team can advise, assess and recommend whatever your project.

30-60-90 minute ratings

To achieve certification, our fire doors are subjected to temperatures of up to 1100°C to achieve 30, 60 and 90 minute fire rating.

Premier's range of Jansen Fire-rated door-sets are individually made to specification to fit any aperture.

Durable and designed to cope with high traffic levels, our sets are available as inward and outward opening doors.

Premier's Gate Expectations

Our range of Secured by Design Rated Gates is designed to be suitable for both pedestrian and vehicle access. They are manufactured specifically with security in mind and are approved to LPS 1175, LPS 2081 and PAS24 2012 standard.

The LPS testing procedure is the process British Research Establishment use to attain SBD approval. The standard comprises a number of security ratings with test requirements of ascending intensity.

Measured in terms of attack tools and also time available to the attacker. This enables specifiers to select products according to the risks that they and their property face.

All Premier products are tested for resistance to deliberate attack and play an important role in protecting people and property against physical attack, burglary, vandalism and terrorism.

Audio and video options

Gate systems can be integrated with a choice of audio and video door entry systems. Premier partners Urmet (UK Ltd), E.I. Systems Ltd and Telguard, all Secured by Design approved.

Designed to please and impress

Premier's in-house design team never fails to deliver when faced with difficult challenges.

In the past 12 months alone they have been key players in a number of beautifully designed and expertly installed high-rise residential balconies and balustrades that have turned the ordinary into something very special.

However, our industry also demands the functional and the robust. Office hand-rails and staircase balustrade may not excite, but they still receive the same level of care and attention from the Premier team.

Drawing on experience

Premier has full-time draughtsmen/designers operating the Solid Works 3-D drawing package. We will produce full costings, design and working drawings through to site installation. Whether we are producing our high-quality Jansen section steel door sets or bespoke staircases and balustrades, our in-house team will be giving it 100 per cent.

Why we love quality street

Throughout all fabrications, Premier carries out constant stringent checks to ensure total quality. We have our own state of the art in-house powder coating and shot blasting facility and provide:

- Powder-coat finish
- Etch-primed
- Zinc undercoat
- Degreasing
- Fine-shot blasting
- BS/RAL colours

Premier service is guaranteed

Premier are committed to providing clients with a 'start-to-finish' service relying on no-one but our own team of designers, manufacturers and installers. Our products are developed and produced in-house guaranteeing quality, reliability and speed of delivery. Installation and after-sales services will also be carried out by us. That's our guarantee.

Staff access security controlled turnstiles, gates and fencing at Enfield Council's Morson Road super depot

Premier team delivers style and security to Borough of Enfield

Premier has a long track record of sustained working partnerships with local councils, governing bodies and housing associations across the country. Indeed, some of our working relationships span more than 25 years.

The London Borough of Enfield in the north of the capital is a prime example of how Premier has become a trusted partner in the redevelopment and regeneration of a vibrant, highly populated area. Our most recent project has seen Premier's team of designers, engineers and installation experts delivering a high-security perimeter fencing and staff entry system at Enfield Council's new Super Depot in Morson Road. The yellow turnstiles have become a recognised landmark at the site. Around 350 staff run services from there including street cleaning, refuse and recycling, mobile libraries and transport.

Elsewhere in the Borough, Premier has carried out extensive SBD security door installations to residential communal buildings at Ringlewell Close, Norton Close and Linwood Crescent.

Premier has also recently completed large-scale works at the Channel Islands Estate of high-rise properties replacing external balcony balustrade to each property.

The project (pictured top left) came in on budget and deadline mirroring the Secured by Design security door system installed at Desmond Court, Linwood Crescent (pictured above). Premier's commitment to maintaining old and forging new trusted partnerships is absolute.

The Premier workforce has been involved in numerous projects across the London Borough of Enfield including those illustrated on these pages and on our map below.
